Some spars will have the halyard with a block instead of the ring. However, most of the masts include the low friction ring. If you prefer the block, it is advisable that you bring your own complete halyard system (hook in block + line + block)

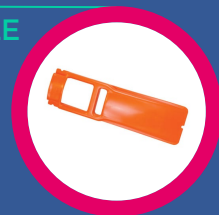

### FOILS

Foils may be N1, DSK or Lange, depending on availability. The tiller extension is the standard 16mm tube with eva foam grip.

\* Some boats may have different hiking straps and ratchet block, but most of them are equipped with Martecna and Nautos respectively.
